

18,100 GALLON WORKSAFE™ MIXER TANK

Features

- 5 Horsepower mixers
- Individual control for each mixer
- Single electrical connection
- Safety stairway and complete guard rail system
- Totally enclosed and vapor tight
- "V" shaped floor with 4" valves at each end for quick cleaning

Technical

WorkSafe™ mixer tanks come with a "V" shaped floor, allowing any residual fluid in the tank to easily flush out through the floor level 4" valves. Staircase, guard rails, and four 22" hatches are standard equipment. To simplify cleaning, three of the four hatches are located near ground level, on the front, right and rear of the tank. Mounted on these tanks are three 5 horsepower mixers with individual breakers and starters, and a single electrical connection point for operator convenience. All Electrical components are explosion proof.

Material Specifications

Steel construction, totally enclosed, cross style internal bracing. Two 4" Butterfly valves located at either end of the "V" shaped floor. Permanently attached axles for maximum maneuverability. Staircase attached to the front and a guard rail system on the roof of the tank. Varc level gauge, pressure vacuum relief valve, and four 22" vapor tight hatches are standard equipment.
